# PHOSPHORUS

Lambda User Controlled Infrastructure for European Research

Integrated Project

Strategic objective:  
Research Networking Testbeds

**Deliverable reference number: D.7.1.5**

**Workshop involving in parallel with a relevant major European event, i.e. TERENA 2008**

Due date of deliverable: 2007-12-31  
Actual submission date: 2008-01-04  
Document code: Phosphorus-WP7-D7.1.5

Start date of project:  
October 1, 2006

Duration:  
30 Months

Organisation name of lead contractor for this deliverable: **AIT**

Release 1

Workshop involving in parallel with a relevant major European event, i.e. TERENA 2008

### Abstract

This deliverable provides a report of major European Conference workshop involving, i.e. TERENA 2008. The TERENA Networking Conference 2008 will be hosted by BELNET, the Belgian national research network and held in Bruges (Brugge) in Belgium from 19 to 22 May 2008. This workshop will engage the EU and international community addressing end-to-end Grid service delivery across heterogeneous network domains.

Phosphorus workshop and demonstrations will be organised in conjunction with TNC'2008, to provide opportunity for Phosphorus to disseminate its output to the wider European community. This also supports the objective to build and consolidate the Links established in the context of Phosphorus with relevant European projects.

This is the preliminary release of the report. Subsequent release is expected after the conference.

## 1 Phosphorus Workshop plans

The Phosphorus workshop will be held 18<sup>th</sup> May 2008, a day before TNC'2008 starts, in cooperation with FEDERICA project.

The workshop agenda which is already available on TNC'2008 brochures:

- 9.00 – 12.00 Tutorial: "Network Control & Service Planes in Next Generation Network and GRIDs",
- 13.00 – 17.00 Workshop: "Challenges in Network Control and Service Planes".

This workshop will discuss architectural solutions for network and IT service integration over high speed network infrastructure. In particular, the workshop will present various implementations of network control and service plane architectures to support the emerging infrastructure-as-a-service model. The main goal is to share the collective experiences gained by major research projects and initiatives around the globe and explore common vision, outcomes and synergies.

The participation in tutorial and workshop will be open and free of charge.
